Compare costs and quality of care.

The costs of medical procedures can vary widely from one place to another, even if they're all in the same area. Here are some examples to give you an idea:

Procedure ¹	Higher-cost facility		Lower-cost facility		Savings ²
	Procedure cost	You pay 20% ²	Procedure cost	You pay 20% ²	
Breast mammography (digital)	\$192	\$38.40	\$86	\$17.20	\$21.20 ¹
Colonoscopy screening	\$2,439	\$487.80	\$784	\$156.80	\$331.00
Leg MRI, lower limb with joint	\$1,914	\$382.80	\$315	\$63.00	\$319.80

Information is based on data from Estimate Your Cost. Estimated costs are available for selected procedures. More procedures are routinely added, so visit anthem.com frequently.

Quality of care can vary from facility to facility, too — and highest cost doesn't always mean highest quality. By comparing how many times a procedure was done, if there were any complications and other important quality measures, you can find a facility that's right for you.
